HensonGroup

Copilot

FREE Trial

Experience Microsoft Copilot 365 before fully committing to it using our sandbox environment!

About The Environment

Experience the power of Microsoft Copilot with our exclusive Copilot Test Drive Environment. Users will have access to starter documents, offering a hands-on demo in a secure setting hosted on our tenant.

To ensure safety, we ask users not to upload sensitive data, as the Microsoft Semantic Index may reference deleted files due to infrequent re-indexing. While deleted documents will eventually be removed, we cannot control the timing. However, all activities are secure from the wider Internet and other Microsoft customers.

Before starting, a signed Copilot Demonstration Environment Usage Agreement is required. Our support team will assist with setup to ensure a smooth and enriching experience. Get ready to see how Copilot can transform your business!

Getting Started

1 Sign the Copilot Demo Environment Agreement via SnapSign

2 Submit a Ticket to thgsupport@henson

3 Cloud Support will designate a date and time to use the environment

4 Support will email login information for the demo environment

5 At the end of the 48 hours, Support will email you that the demo time is up

6 Support will terminate all sessions, clean up data, and change passwords
