

Cloud Control

Optimize Your Azure Environment and Save!

Unlock the full potential of your Azure environment with Cloud Control by Henson Group.

Our comprehensive suite of products is designed to optimize your cloud infrastructure, ensuring cost efficiency, enhanced performance, and robust security. With Cloud Control, you can reduce your current monthly Azure spend by leveraging our advanced tools and technologies.

Azure Cost Containment & Optimization

- **Cost Savings & Value:** Our cloud architects provide automated assessments, cost analysis, and improvement recommendations to help you save costs and enhance security.
- **Follow-Up & Remediation:** After the initial assessment, we offer a detailed assessment using AvePoint and other resources. Our remediation services include Optimization ProServ or Managed Services, with an approximate duration of three weeks to provide initial recommendations. We also let logging run in your environment to uncover additional savings.
